2nd February 2026

Your Excellency Mrs / Mr Consul General ... Vorname Name

On January 29, 2026, US President Trump declared Cuba a "threat to national security" and declared a national emergency for the United States by executive order. In this, the USA can impose tariffs on goods from countries which directly or indirectly supply oil to Cuba. Furthermore, your president has threatened to seal off Cuba through military means.

In the most strongest form we condemn this declaration of your president. This is an illegitimate and restrictive act of your government against the government and people of Cuba.

In the most strongest form we condemn the policy of the USA which aims to disrupt international cooperation especially with Cuba which has had to go through a complex social and economic situation for almost 70 years largely through trade, economic and financial blockades, much of this on the part of the USA government.

Cuba has a right to sovereignty and territorial integrity!

Cuba enjoys in circles in the USA as well as internationally recognition and appreciation due to her continuous international humanitarian assistance especially in the fields of health and education. Cuba as with other countries adheres to her own laws and international law and pursues mutually beneficial relations with other countries. **By defending these laws, her sovereignty, her territorial integrity and her right to self determination, we will not let the current government of Cuba and her people stand alone. Together we stand for the well-being of the people, peace among all peoples, for stable, respectful and equal relations among all peoples.**

In contrast, the policy of the USA relied and continues to rely on the subjugation of other states, peoples, extermination of other ethnic groups in order to enforce deeply reprehensible, selfish interests of a small number of species who think they belong to the peace fighters. In order to know that the world public is on their side to enforce their selfish interests, they make use of a highly absurd construct of lies and believe that they can cement its durability with outrageous threats against third countries. U.S. politicians are mendaciously talking about the U.S. bringing the light to Hanukkah 2025. In view of the history of the USA to this day, a large part of humanity has had to learn bitterly over centuries: It is the light of deadly shots and bomb explosions combined with glowing red, the red of the blood of millions of women, children, men who had to die in the raids of your country.

STOP THESE CRIMES!

We demand that the US government immediately implement the following measures:

- End and permanently cease all counter-revolutionary, subversive actions against Cuba, Venezuela and other countries;
- End and permanently cease all blockade policies against Cuba and Venezuela;
- Give material and financial compensation to the entire Cuban people for the damage caused by the trade, economic and financial blockade against Cuba;
- Remove Cuba from the list of state sponsors of terrorism;
- Withdraw US military forces from the Caribbean;
- Return of the Guantánamo territory, occupied by the US in violation of international law, to Cuba;
- Release of the President of Venezuela, Nicolas Maduro, and his wife;
Return of Venezuela's stolen oil tankers and payment of appropriate compensation for the killings and destruction caused in Venezuela;
- Cessation and permanent cessation of all overt and covert forms of interference in the internal affairs of another country;
- Return to the tables of the UN and WHO with constructive contributions in respectful negotiations to ensure its protective obligations towards all of humanity and our planet.
